

LONDON METROPOLITAN UNIVERSITY
PROFESSIONAL WORK PLACEMENT

LEARNING LOG

YOUR ID: 18029036

YOUR NAME: Shusan Adhikari

YOUR COURSE: Work Related Learning

YOUR WRL TUTOR: Mr. Sandeep Gurung

Module Code: FC6W51NP

PLACE OF WORK: QuadGames Pvt. Ltd.

DATES OF ENTRIES IN LEARNING LOG:

13th January 2022 to 21st January 2022

LEARNING LOG

For the period 3rd February 2021 to 10th February 2021

What have I done? (relate tasks to Learning Outcomes)

On the second week of my internship, I had a meeting with my supervisor to review the tasks I did in my first week. I was given a clear instruction of what was expected from me by my supervisor again. I was also reminded about the terms and conditions and asked to maintain the rules and regulations formulated. Before I started coding, I did some research on the internet and had a session with one of my co-workers. They provided me with some resources and gave me a clear idea of what I needed to do in the second week. I continued to develop the frontend for the home page where my colleagues provided me with the assets and 3D models that were required.

What I did well (refer to skills used)

I have always found myself in awkward situation when trying to talk to new people, but I was much comfortable from the very first week of my internship and continued to working at it in the second week too. I was feeling comfortable around people and had discussion with most of my colleagues on what I can do better in the coming weeks. I got a good response from my coworkers and I felt much familiar and motivated. Even in the second week, I feel like I am developing my communication skill and getting around new peoples much better than I used to do.

What I could improve on (i.e. skills I want to improve)

My problem in finding solutions to the errors I come across also continued during the third week of my internship. I could not adjust myself to the requirements that the company proposed. I had to work my ways around and had to talk to a lot of my co-workers to find a proper solution, but I am getting used to this and having a proper idea of what I am required to do. So, I hope I can have better understanding of problems and solve them on my own.

Action I can take to improve my skills and learning (make these “SMART”):

Goal - To improve my problem-solving technique

Action – As I stated earlier, despite working on projects like this earlier I was facing problems to adjust myself to the problems I was facing in the management. So, I clearly need to have a deeper look on the media queries so I could design user-friendly responsive designs. Internet has always been a good friend of mine, so I need to spend more time researching the queries that I need to know during my time at the office. Although, I have been getting helps from my friends and co-workers I still need to have a lot more discussions with them since they have been in this field for longer than I have and they always have something new and useful to offer that I can learn.
